---

SUMMARY

A highly experienced Senior Software Engineer with over 9 years of experience in Web & Mobile development. Skilled in Front end development using modern JavaScript frameworks and libraries such as React and Angular. Proven track record of success in committing to software product design, development, and maintenance tasks. Innovative problem-solver with a passion for success.

TECHNICAL SKILLS

- **React / React Native**
- **Next.js**
- **JavaScript / TypeScript**
- **Node.js / Express**

- **Restful API /GraphQL**
- **Redux / Context API**
- **SEO / Accessibility**
- **Material UI / Ant Design**

- **MySQL / MongoDB**
- **Jest / Cypress**
- **AWS / GCP / Azure**
- **Agile / Git / Docker**

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer | K Health   05/2021 – Present

Skills: React, React Native, Node, Express, Material UI, Jest, Redux Toolkit, Azure, JavaScript/TypeScript

· Implemented a fully-functional, user-friendly dashboard for monitoring the performance of the healthcare platform with intuitive charts, graphs and visualizations to easily identify opportunities for improvement, increasing patient satisfaction by 45%.

· Developed an AI-powered symptom checker within the healthcare platform using React that enabled users to efficiently and intuitively diagnose their symptoms.

· Developed interactive data-visualization techniques using D3.js for better data representations that enabled a better understanding of key metrics and offered faster decisions-making.

· Increased platform accessibility, resulting in 120% more users, by adhering to WCAG 2.0 standards and utilizing various accessibility-testing tools.

· Facilitated the MVP design, development, and deployment in an agile environment while mentoring and providing feedback to junior developers to improve code quality.

· Mentored and guided junior developers, conducting code reviews and providing constructive feedback to foster growth and improve code quality.

Senior Frontend Engineer | Uber   04/2017 - 01/2021

   Skills**:** React, React Native, Redux, Node, Apollo GraphQL, Payment API, AWS, iOS / Android, TypeScript

· Served as a senior frontend engineer on the UberEats product to add new features which are utilized by millions every day.

· Developed a feature to enable eaters to discover new restaurants and restaurants to grow their customer base, integrating Google Maps with React and Node.js; which led to a 10% increase in restaurant distribution.

· Designed, implemented, and tested UI elements to offer eaters multiple delivery options, including daily dinner deal, and zero delivery fee, using React, Redux, Material UI, TailwindCSS, and Node.js.

· Coordinated with multiple teams to act on urgent feature requests, quickly launching eater-to-restaurant donation feature.

· Maximized the performance of the UberEats platform, reducing load times with the use of powerful features such as lazy loading, virtualized lists, server-side rendering, and other effective techniques.

· Developed and maintained a robust test suite, including unit tests, integration tests, and end-to-end tests, increasing code coverage by 20% and reducing the number of bugs.

Full stack Engineer | Binance   05/2016 - 03/2017

   Skills**:** React, Redux, Ether.js, Node, Apollo GraphQL, AWS, Lighthouse

· Contributed to start-up company and teams by developing NFT subscription platform using React/React Native + Node + AWS + Web3.

· Provided an isolated environment to showcase components of their own isolated environment without the need to build an entire application using Storybook.

· Integrated API endpoints using Node.js and Express for data retrieval, validation and manipulation.

· Took part in all processes of SDLC including analysis, design, development, documentation, testing, and deployment.

· Analyzed application performance and improved the performance by removing unnecessary re-rendering with the best practice.

Web Developer | Cubix   10/2014 - 03/2016

   Skills**:** React, Redux, HTML, CSS, SCSS, jQuery, Git, PHP

· Developed advanced web applications using React, Redux, HTML5 and SCSS with the best practice.

· Translated designs & wireframes into a pixel-perfect and fully-responsive application, leveraging HTML, CSS, and JavaScript to create a user-friendly interface.

· Understood the core concept of React like Virtual Dom, JSX, its benefits, and use cases by developing small React applications.

EDUCATION

THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY

Bachelor of Engineering: Computer Science (2010 - 2014)
